Power Communication Product A. Mobile VoIP Solution B. VoIP Solution for Office PABX C. I-Power

(I) Mobile VoIP Solution

- Power Connect is the new VoIP solution for enterprise mobile users. At this moment in time, the staffs of company call to overseas with high cost of IDD for daily business communication.
- For this reason, Power Communication design a high tech cost saving solution to help enterprise to reduce the high cost of mobile IDD fee with the high voice quality for daily communication.
- With the Power Chip, simply to attach together with the SIM card, with this solution customer don't have to change the mobile number or any dialing habit.

What is Power Chip?

- Power Chip is a high tech slim IC Chip that design to attach together with SIM card. Its GSM standard applied so it won't affect the SIM basic function at all. With the Power Chip installed.
- It will auto detect the international prefix like "+","001","009"..etc and re-route the IDD calls to Power Communication VoIP system.
- The Power Chip itself didn't generate any power or lunch any frequency, it won't cause any damage on the mobile phone or SIM card.
- Power Chip is IC card standard 7816 applied, and 100% compatible with GSM11.11 and 11.14 standard.
- The mobile user can call overseas anywhere in Thailand with out any inconvenient.

How to install Power Chip?

Remove the SIM from Mobile phone, attach with Power Chip.

- **1. Remain the same mobile number and dialing habit.**
- **2.** Co-operate with biggest ChungHwa Telecom in Taiwan that provide you the best voice quality.
- 3. Help to reduce 40~50% saving.

(II) Power GW for office PABX

Power Connect Diagram for Customer Office PBX

VoIP Solution for Office PABX

Power By

Power Gateway is the VoIP equipment special design for office PABX. This complete solution helps to reduce overseas /domestic long distance call for enterprise and hospitality customer in daily communication. It is simply connect between ADSL internet and the office PABX CO ports.

After PABX vendor programming the PABX, the end user just pick up the extension phone set and dial to overseas or domestic to reduce the communication cost with stable voice quality. When the internet got problem, the user still can dial by normal way via TOT or True telephone service.

In addition to business interests Power Gateway also offers options for you while you are dialing as follow for domestic package:

1. Show your phone number to the recipient either mobile number or office number

2. Show private/ unknown number to the recipient

Even though when the Internet can not be used. You can also call the same network with True or TOT or TT&T.

Power Gateway 4/8/16/24 ports

Power Gateway is base on VoIP technologic to become a voice bridge to connect between analogue(PSTN) and digital(IP) phone line.

With this technologic, customer can be able to reduce the communication cost 40~50% in average.

This equipment can be connect to enterprise PABX or 2.4G wireless phone set for office/home office/home user to dial.

Power IP-Phone

Power IP-Phone is a telephone in the digital format that can work like a regular phone for general analog signal. It's only exchange signals between the IP Network to link to Net workSS7 of users and the usage will still comfortable where the jobs do not have to work with PBX which can also work independently in every area of business or home. More over, it can also call each other for free 100% between the two IP-Phone up It also can call the domestic network, and other countries around the world in a very price savings for the best value and most effective way of communication.
